

Mvix | Flex Digital Signage

| What is Mvix Flex? What hardware is supported?

Mvix Flex is a digital signage platform designed for the use of the Mvix [XhibitSignage digital signage software](#) with 3rd party (BYOD) digital signage players/screens. Users can buy their own signage hardware to use with the XhibitSignage cloud software.

The Flex platform provides firmware that can be installed on the following hardware:

- Google Chrome OS
 - Recommended Hardware: ChromeOS based Players
 - [Asus Chromebox](#)
 - Firmware: Mvix Flex-C
 - Google G-Suite account and Kiosk license required
- BrightSign (Series 3 & 4 only)
 - Recommended Hardware: XT / XD Models
 - Firmware: Mvix Flex-B
 - MicroSD card required (8GB or larger)
- Mini PC
 - Recommended Hardware:
 - [Intel NUC 7 Essential Mini PC](#)
 - [Zotac ZBOX CI325 Mini PC](#)
 - USB drive required (4GB or larger)
- Android (version 6.0 and newer)
 - Recommended Hardware: [Xiaomi Mi Box](#)
 - Firmware: Mvix Flex-A
- LG Web OS for Digital Signage (3.0 and above)
 - [Click here](#) for a complete list of compatible LG Digital Signage displays. On this page, you can also filter by features such as display size and 4K resolution.
 - Firmware: Mvix Flex-L
- AOPEN Chromebox Commercial 2
 - [AOPEN Chromebox Commercial 2](#)
 - Firmware: Mvix Flex-C

| How does it work?

1. Purchase one of the recommended hardware from the list above.
2. Contact our [Support Center](#) to download the latest version of Device / Screen Firmware.
 - a. For Chrome OS: Device firmware app is available for download from the [Chrome Web Store](#).
3. Install the device firmware on your device. For assistance on installation, contact Mvix Support Center.
4. Once the firmware is installed on the device follow on-screen instructions to activate device:
 - a. Record the device ID shown on the screen
 - b. Using a PC or a Laptop, go to:
<https://www.xhibitsignage.com/activate>
 - c. Enter your company details and <https://www.xhibitsignage.com/activate> device ID on this activation page.

Please activate your device

Thank you for choosing Xhibit Signage! This device has either not yet been activated, or the Chrome app was previously uninstalled. Please visit [xhibitsignage.com/activate](https://www.xhibitsignage.com/activate) and provide the following ID in order to activate your device:

CA * * * * *

This screen will automatically refresh once your device is activated.

- d. Usually, it takes about 24hrs or less to activate your device. Once activated, you will receive an email with credentials to login to www.xhibitsignage.com and start managing your content.

| How much does it cost?

No of Licenses	Flex-C	Flex-B	Flex-L	Flex-A
	Chrome OS	BrightSign	WebOS 3.0+	Android OS 6+
Small Projects up to 4 devices	\$34	\$34	\$34	\$34
Medium Projects 5+ devices	\$29	\$29	\$29	\$29
Large Projects	Please Call	Please Call	Please Call	Please call

Licensing cost is per device (or screen), per month, billed annually.

| How many devices/screens do I need?

You need one device (signage player/hardware) behind each screen. So if you plan on using 5 screens, you will need 5 signage players/devices.

Each device / player will be connected to the screen via a HDMI cable and to the internet via wired network cable or wireless. Wired networks are always preferred due to security and robustness.

If you plan on using the LG Display Screen, then no external / 3rd party signage player is required. The screens have a built-in player. The screen connects to the cloud-server directly over the internet.

| How do I get started?

1. Contact your solutions consultant to receive a line-itemized estimate for your project if needed
2. To avail the 30-day FREE trial of the software, complete this [TESTING / EVALUATION agreement](#).
3. Purchase your device (Google Chrome OS or Android OS, based) from any reliable retailer
 - a. Optional: To purchase a pre-configured device directly from Mvix, talk to your Solutions Consultant.
4. Open a ticket on our Support Center (www.mvixusa.com/support) and request the following:
 - a. Latest firmware for the device.
 - b. Detailed instructions on how to install the firmware
5. Once the firmware is installed on the device, visit www.xhibitsignage.com/activate and request activation.
6. Discuss your [personalized training needs](#), to learn the cloud-based digital signage software, with your solutions consultant.
